- QA Automation Retainer

Discovery Call Questions

1. Product: Which checkout-quality workflows create the most customer friction today?
2. Engineering: How does the team maintain release confidence around Lead capture, booking, checkout, and mobile release confidence?

3. QA: What automated coverage exists today, and where is it unreliable or missing?
4. Release Process: Which release paths need the most manual regression checking?
5. Risk Areas: If Daniel reviewed Playwright Smoke Test, what would make the audit useful within the first engagement?
