Opportunity Score	100/100
Evidence Readiness	95/100
Recommended Engagement	QA Audit (\$199-\$500)
Recommended Next Action	Review Nolan Parker and the LinkedIn path manually, then approve or reject a QA Audit outreach angle before any external action.

Business Context

Industry	Gym Management SaaS
Product Type	SaaS product
Observed Opportunity Areas	signup/onboarding coverage, checkout regression risk, payment flow risk, regression testing opportunity, mobile flow review, checkout-quality, Lead capture, booking, checkout, and mobile release confidence, Playwright Smoke Test
Potential Risk Areas	Create future smoke coverage for public page load and navigation visibility., Review performance improvements for the public homepage., Lead capture, booking, checkout, and mobile release confidence, public homepage and primary CTA, booking journey entry, checkout/payment handoff if public, mobile viewport journey, release confidence opportunities

Scope of Work

Objectives

- Review public evidence and current audit signals before any engagement decision.
- Define a bounded QA service path using approved Studio offers only.
- Create a practical path from audit evidence to repeatable Playwright coverage.

In Scope

- QA Audit Report review
- Playwright Smoke Coverage planning
- Release Confidence Review
- Evidence Package review
- Automation Recommendations based on current Studio evidence

Out of Scope

- Contracts, invoices, payment requests, and proposal sending
- Authenticated systems, private production data, account creation, and payment submission
- Vulnerability scanning, penetration testing, guaranteed bug discovery, or compliance certification
- Any claim not supported by collected evidence and Daniel review

Deliverables

- QA Audit Report
- Evidence Package
- Automation Recommendations
- Release Confidence Review

Engagement Options

Option A: QA Audit (\$199-\$500)

Best for: Validating the first evidence-backed QA opportunity before a larger engagement.

Recommended: Yes

- QA Audit Report
- Evidence Package
- Automation Recommendations

Option B: Playwright Starter Pack (\$900-\$1500)

Best for: Creating the first maintainable smoke suite for approved public or staging flows.

Recommended: No

- Playwright Smoke Coverage
- Release Confidence Review
- Evidence Package

Option C: QA Automation Retainer (\$1500-\$3000/month)

Best for: Maintaining and extending QA automation after audit and starter coverage value are validated.

Recommended: No

- Repeatable QA Process
- Automation Recommendations
- Recurring evidence review

Retainer Path

- QA Audit
- Starter Pack
- Retainer

Client Success Criteria

- Clear Visibility into public QA risk and automation opportunities
- Reduced Release Risk through agreed smoke and regression coverage
- Improved Confidence before client-facing releases
- Repeatable QA Process supported by evidence and reporting

Approval Checklist

- Evidence Reviewed
- Pricing Reviewed
- Scope Reviewed
- Proposal Reviewed
- Daniel Approval Required

Disclaimer

- This proposal is based on publicly observable information and collected evidence.
- Potential opportunities are observations only.
